

## Redesign your meetings.

The best features of both  
digital and analog meetings  
combined into one device.

**cannyboard**

## The new meeting experience – with the best features of the digital and analog worlds.

**cannyboard** provides a completely new level of digital collaboration. Both onsite and remote meeting attendees will experience a new measure of digital flexibility and quality. For more productive, more effective, and just better meetings.

- » **Everything in one device:** Projector, screen, and video conferencing – **cannyboard** combines everything into one perfect digital solution
- » **Familiar features in digital form:** The **cannyboard** app replaces flip charts, sticky notes, highlighters, and more – for sustainable meetings without any paper at all
- » **One meeting, limitless locations:** **cannyboard** provides for hybrid working sessions with an unlimited number of attendees – and with the quality of in-person meetings

# A lot of space for perfect meetings – the cannyboard 86".

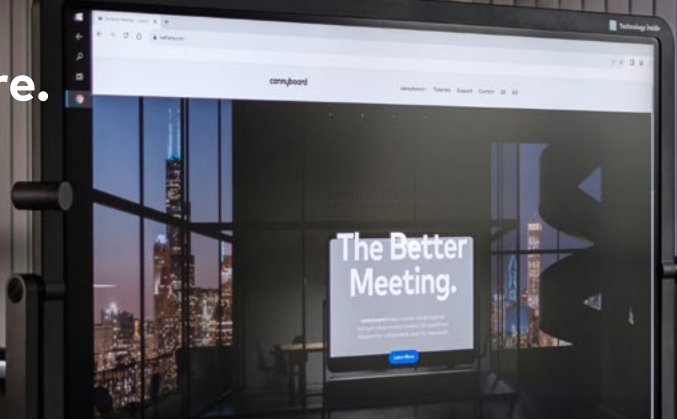

Big, visually brilliant, powerful. The **cannyboard 86"** provides plenty of space and freedom for meetings and creativity. Made for impressive presentations, discussions involving plenty of notes, complex workshops and a whole lot more.

- 1 86" multitouch display with InGlass touch technology for touch entries using a finger or a stylus and interactive collaboration with up to 20 touch points
- 2 4K resolution for a visually brilliant presentation
- 3 Ultra wide-angle camera with 6.3 megapixels for picture transmission that captures the whole room.
- 4 Swiveling display that is more ergonomic during work
- 5 Integrated array microphones for the best audio transmission
- 6 Integrated 2.1 sound system to provide the perfect tone in the room
- 7 Modern, sturdy design with a practical shelf element made of wood
- 8 Mobile pedestal made of aluminum

- + Integrated, high-performance PC complying with the highest safety standards
- + Many connection options: Dual band Wi-Fi, wireless screen sharing, HDMI, uncomplicated without downloading an app and without registration
- + Four USB ports

# Simple. Secure. Get started.

The **cannyboard** is ready for use just a few seconds after switching it on. It can be used immediately by all users – without long loading times, without registration, without entering a password and primarily without cutting corners in security.

## Activation without stumbling blocks

- » Position the **cannyboard** in the room
- » Connect the power cable
- » Provide the Internet connection (LAN or WiFi)
- » Press the power button

## It is immediately ready to use

- » After starting, a comprehensive Windows user interface with all the customary conference and co-working tools is provided, together with the **cannyboard** app
- » Presentations and screen sharing are possible even without an Internet connection
- » Ad hoc connection with mobile consumer products using a QR code – both onsite and remote
- » No downloads or installations

## Secure in the cloud

- » All data and work products are stored securely in the cloud in real time
- » You can access all your information using your free **cannyboard** account from anywhere at any time

## Maximum data security

- » All data is encrypted before transmission or storage (https/SSL)
- » All work products are password-protected and available via your personal account
- » The **cannyboard** app complies with European and American data protection standards.

# One solution for everybody and everything.

The **cannyboard** is a technology-independent system. This means that all users can, with complete flexibility, use just those apps that they like to use. From conference tools such as Microsoft Teams, Zoom or Google Meet to web-based applications like Office 365, Miro, Google Chrome, TV streaming or YouTube.

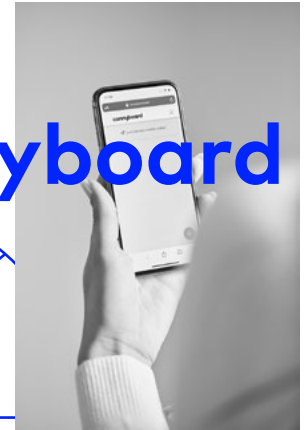

# cannyboard app: One app, one meeting, many locations

The **cannyboard** app cracks the digital barrier for online meetings and allows groups, with shared sessions, to collaborate synchronously, interactively, and independent of location. With the **cannyboard**, all participants work on the same desktop, use the same tools at the same time and can see, hear and discuss topics using the video call function.

For this, the **cannyboard** app, with its various tools and shared sessions, is the perfect foundation for successfully holding meetings that span locations:

- » Start a session with the push of a button
- » Barrier-free participation without registration or login
- » Simple wireless linking of mobile consumer devices such as laptops, tablets and smart phones
- » All the workshop tools of both the analog and digital world are bundled into one application
- » Optimum collaboration on a shared desktop with the same tools at the same time
- » Perfect communication for all participants using the high-end video call function

The result: Hybrid and online meetings with the quality of in-person meetings – without cuts or compromises.

# Intuitive visualization & maximum connectivity.

Easy understanding and intuitive operation are the most important factors in the success of a tool. This is why all features of the **cannyboard** app are completely tailored to the users and their needs. The goal is always to create the best possible meeting app and, like that, to provide a tool that sets the standard with its simplicity and quality.

## Writing, drawing, commenting.

With one touch, open digital sheets and make notes on contents, devise sketches or create graphics. All the analog and digital tools that you know from classic meetings have been combined here in one intuitive tool. For example, creating with different colors, line thicknesses and markers – completely without expensive special pens, simply with your bare hands or a wooden stylus.

## The cannyboard stylus.

***"Simplicity is the highest level of perfection"***

Leonardo Da Vinci

## Unlimited connectivity.

Whether with a smart phone, tablet or laptop – virtually any consumer device can be connected quickly and simply to the **cannyboard** and the **cannyboard** app – regardless of the manufacturer and operating system.

## Screen sharing.

Easily share presentations, lists or other contents – wirelessly or via HDMI cables.

## Wi-Fi access point.

The session board provides the necessary Internet connection to the participants directly.

# Interactive variety for everyone.

Participation in a **cannyboard** meeting is just as simple as it is multifaceted. A brief scan of the QR code generated by the **cannyboard** app is sufficient and the smart phone, laptop or tablet connects automatically to the desired meeting session. Now, any and all content from your own device can be shared in the session by way of the **cannyboard** app.

Whether text, graphics or PDF – the **cannyboard** app makes input of whatever the participants have up their sleeves.

The entire group can discuss, evaluate and use templates for simple structuring by way of the common user interface – this makes the meetings approachable and interactive for all attendees.

**No downloads, no installation, a lot of options.**

The attendees transmit their contributions by way of the **cannyboard.app** in the browser – without having to install anything on the consumer device.

## Input variety for everyone.

# Redefining the digital meeting workflow: Time saving and productive.

## Simple preparation.

Digitally prepare meetings, workshops and conferences comfortably at your desk. All your content can be uploaded intuitively using drag & drop into a **cannyboard** session. Securely stored in the cloud, it can then simply be opened in the meeting.

## Meeting structure.

Useful tools such as timers, shelves and various work areas (phases) help to create structured sequences, to sort and file contents and to keep time

## Documentation.

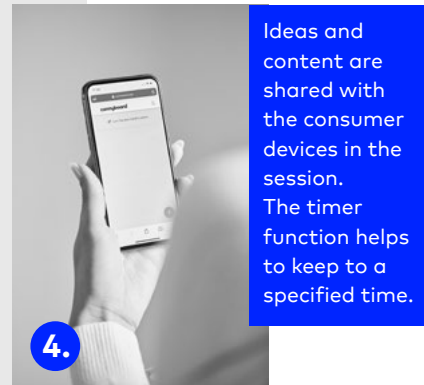

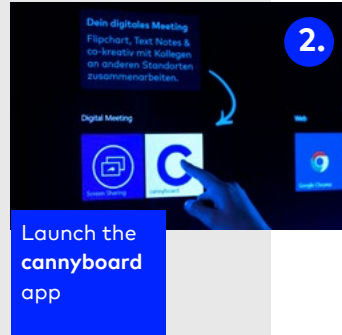

Work products are stored in real time in the cloud and can be assigned to and stored in a **cannyboard** account with one click. After this, the collected products of all attendees are available digitally.

## Data and session management.

All meetings and the associated **cannyboard** sessions and results can be managed, stored and edited in a browser in the **cannyboard.app**.

# Just 60 seconds to perfect brainstorming.

# Once you use cannyboard, you will always use cannyboard – that is what our customers say.

*"We use the cannyboard to run our digital workshops with our customers. Thanks to the diverse features, we can collaborate and interact in the best hybrid manner with the attendees. For us, this is a tremendous gain compared to conventional video conferences."*

**Uwe von Grafenstein,**  
Kalhammer & von Grafenstein GmbH,  
marketing agency and marketing  
consulting

*"With the cannyboard app, we have found the perfect tool that helps us to collect and sort ideas, precisely in the early development phases. The cannyboard has become an essential component in our daily routine, directly in the SCRUM workflow."*

**Georg Weiss,** Manager of  
technology development,  
TQ Systems Durach GmbH

*"Using the cannyboard, we are able to frame our video analyses of professional volleyball to be more interactive and more effective. The players can contribute, they have a brilliant image and we, as coaches, can perfectly prepare and present our analyses using the cannyboard app."*

**Thomas Ranner,** Coach of WWK  
Volleys Herrsching, German National  
Volleyball League

*"Our students love the cannyboard. Now we can format lessons to be much more interactive, even in small and medium-sized groups. We can also plan projects and share the results – real added value for the faculty and students."*

**Prof. Dr. Christian Vogelei,**  
Dean of the School of Mechanical  
Engineering, Kempten University  
of Applied Sciences
